

Introduction

Welcome to Ethereum Classic HalFLIFE Blockchain (EHL), a groundbreaking initiative to revolutionize the blockchain space by introducing a Layer 3 structure, scaling Layer 2 operations for original Layer 1 adoption. EHL is designed to address key challenges facing existing blockchain ecosystems, offering a more efficient, secure, and decentralized platform. Our mission is to pioneer the integration of layer 3 technology, bringing unprecedented scalability, interoperability, and real-world application to the crypto space. This encourages the total digitalization and tokenization of real-world assets into the metaverse and a new set of crypto adopters for the next bull run.

Problem Statement

- Scalability
- Limited Decentralization
- Interoperability
- Blockchain adoption
- Blockchain Startup Initiatives
- Complexity

Our Solution

- Layer 3 Architecture
- True Decentralization
- Interoperability
- New and improved blockchain use-cases
- Blockchain Startup Support
- Developer-Friendly dApps

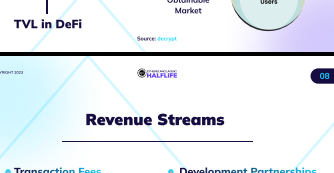

Use-Cases

- Blockchain in Finance
- Blockchain in Agriculture
- Blockchain in Transportation
- Blockchain in Real estate
- Blockchain in Gaming
- Blockchain Digital Economy

Product Demo

Market Size

Revenue Streams

- Transaction Fees
 - Development Partnerships
 - Consulting Services
 - Token Sales
 - Startups ROI
- We will use some of our revenue to buy our tokens back from the market and burn them to directly incentivise and reward our project's investors.

Token Utilization

- Transaction Fees
- Governance
- Staking
- Policies

Community Benefits

- Decentralized Governance
- Education and Awareness Programs
- Community-Driven Development
- Unique Blockchain Startups Support
- Staking Rewards and Network Security
- Exclusive Access to New Features
- Community Events and Networking
- Community-Backed Initiatives Fund
- Incentive Programs for Adoption

Tokenomics

Total Supply:	10 Billion
Pre-sale:	30%
Locked in Liquidity:	14.5%
Burn Events:	10%
Ecosystem and Development:	10%
Airdrop:	2%
Staking and NFTs:	5.5%
Team:	5%
CEX Listing:	5%
Partnership:	5%
Marketing and Awareness:	3%
Reserve:	10%

Road map

- Q4 2023**
 - Community Building and Pre-sale
- Q1 2024: Testnet Development**
 - Token Deployment
 - Blockscan Implementation
 - Decentralized Exchange (Swap Only)
 - Staking and Farming
 - Airdrop to Testnet Contributors
- Q2 2024: Mainnet Launch**
 - Token Deployment (Mainnet)
 - Enhancements to Mainnet
 - Blockscan
 - Launch Decentralized Exchange (Mainnet)
 - Implement Staking and Farming on Mainnet
- Q3 2024: Strategic Partnerships**
 - Identify and Establish Major Partnerships
 - Develop Multichain Bridge for Interoperability
 - Pursue Listings on Centralized Exchanges (CEX)
 - Transition to Layer 2

Road map

- Q4 2024**
 - Architecture Design and Planning
 - Smart Contract Migration and Security Audits
 - Integration with Layer 1
 - Deploy Layer 2 on Testnet
 - Comprehensive Testing and Issue Resolution
- Q1 2025**
 - Mainnet Deployment of Layer 2
 - Deploy Layer 2 on Ethereum Classic Mainnet
 - User Education and Migration Support
 - Security Audits and Upgrades
 - Full Layer 3 transition
- Q2 2025**
 - Scout for real-world crypto adopters/startups
 - Liquidity engagement
 - DeFi culture

Thank You
